

New Wave of Glory

**V1: I remember when the glory fell that one camp meeting night
The preacher was heard preaching
How the Christian must live right
The people started praising God
You can feel the Holy Ghost
And I just can't describe to you just how the Glory rolled**

**V2: I was sitting in the second row the fourth seat on the right
When a holy presence entered that could not be denied
And before I even knew it I was standing to my feet
People shouting, people praising
You could hear some other weep**

**V3: The next thing I remember I was walking down the aisle
The glory filled the entire room
In Hallelujah style**

**Chorus: We need a new wave of glory let it flood down in our soul
We need the power of your spirit
To come in and take control
We need a holy anointing like we've never had before
We need a new wave of glory in our soul**
